

## WOOD EFFECT MFC OPTIONS

Reproductions of timber such as oak and nordic inspired white-wash offer fine detailing with wood grain textures giving a natural and 3-dimensional finish. Saw marks, knots and sandblasted effects provide a natural, almost raw look. Timber effect melamine looks fantastic on its own or when coupled with contrasting edge banding or block colours which emphasis the finer detail in the prints.

TRUFFLE BROWN

GREY NORDIC OAK

NATURAL NABRASKA OAK

WHITE NORTH WOOD

NABRASKA OAK

WALNUT

## BLOCK COLOUR MFC OPTIONS

The selection of muted tones in our matt block colour options create a sense of exclusivity with an anti-fingerprint finish creating an understated high value look and feel.

These block colours look fantastic when used on their own but have also been hand-picked to complement our wood effect options so customers can mix and match textures and styles for a truly unique finish.
